

Introducing the Power Pro PH5 and PH5r

Outside it may look the same but the insides are *ALL NEW*

The PH5/PH5r are the updated follow on to our famous PH-Pro and PH-Pro-r five Amp DCC systems. They are scalable, upgradable and continue our 'nothing wasted' product plans. Fully backward compatible with all previous products the PH5 the PH5/PH5r bring the latest features while still providing reliable performance.

System Features:

All new circuitry. Four times the memory, four times the speed of previous systems. Improved program track circuit. NO complicated shutdown, just turn it off. Update-able from the Internet via included Single USB. Support for all 69 NMRA functions. Single point update – update the main box and all ProCabs will also be automatically update (even your older Procabs).

Easy to use ProCab throttle with backlit high contrast LCD display. Ergonomically designed for single handed, ambidextrous operation. Simplified momentum control and one button F0-F9 control (2 buttons for F10-F69). Easy consisting. Durable design and construction. Choice of thumbwheel or push button speed control.

All connecting cables and accessories included. Also includes a 90 Watt international power supply approved for use in USA, Canada, Australia, UK, EU, Mexico and Argentina.

The PH5r includes wireless radio base station (RB02) for reliable wireless throttle operation. The PH5 can later be upgraded to PH5r wireless operation by the addition of an RB02 and 1 to 48 wireless enabled ProCabs or Cab06 engineer throttles. PH5r not for sale to Canada or UK
